Forecast for Wednesday 23 Dec 2020

Weather: A dry day in the south with some bright or sunny spells. High cloud in the morning will mean that sun will be hazy and diffuse, but this cloud will thin from the north to allow some sunny spells to become stronger. Further north, a few mostly light snow showers will start to push into the Aberdeenshire Hills and perhaps just into Glenshee and the Braes of Angus.

Chance of cloud free mountain/hill tops above 800m: 90% or more in south, falling 40% in north with some occasional cloud on the tops mainly near showers.

Visibility: Very good much of the time, but occasionally poor in the north.
